## FCO Product Details

### PRODUCT DESCRIPTION

The Moffitt FCO natural intake /daylighting louver is designed with translucent blades to act both as an airflow device and a daylighting device. It is normally used for air intake, but can be used as an exhaust device in certain applications. The louver frames are constructed of lightweight and corrosion resistant aluminum. The louver is normally electrically actuated, but can be manual or pneumatic. Each unit ships in factory assembled, maximum panel sizes.

### STANDARD FEATURES

- Aluminum Construction
- Compact Shipping
- Glass Louver Blades

### OPTIONAL FEATURES

- Paint to color match in various material coatings

### PRODUCT BENEFITS

- Uses no energy
- No maintenance
- Silent operation
- Zero operational cost
- Long life span
- Architecturally pleasing
- Minimal impact to building, limited structural work necessary

### INDUSTRY APPLICATIONS

- |                   |                          |                         |
|-------------------|--------------------------|-------------------------|
