PF7100-7300 Axial Wall Ventilator

PF7100-7300 Side Wall Propeller Fans Product Details

PRODUCT DESCRIPTION

Moffitt Corporation industrial axial wall fans are extremely popular for general building ventilation. Their versatility provides great application diversity. Fans are used in both industrial and commercial applications, and can be orientated for either supply or exhaust applications. Units are excellent for providing worker comfort, and spot cooling when used in the supply mode. Numerous optional features offer you flexibility unmatched by any other fan supplier.

PF7100 Sidewall Propeller Fan - Direct Drive

PF7300 Sidewall Propeller Fan - Belt Drive

STANDARD FEATURES

- Size/Diameter: 12" - 120"
- CFM Range: 500 – 100,000 +
- 7300 Series - Belt Drive
- 7100 Series - Direct Drive
- Direct Drive RPM's of 1800, 1200, 900 or 700
- All Galvanized Steel Construction
- Propeller: Aluminum
- Motor: Open Drip Proof
- Complete Operation & Maintenance instructions along with assembly drawings, supplied with fan shipment

OPTIONAL FEATURES

- Structure:
 - Wall Housing
 - Wall Collar
- Construction
 - Stainless Steel
 - Aluminum
- Propeller- FRP Blades with Cast Aluminum Hub
- Reversible orientation
- Inlet / Outlet Guard: ½" mesh, 19ga galvanized
- Polypro Impeller with Cast Aluminum Hub
- Rain hood – 90°Supply, 45° Exhaust
- Damper
 - Automatic Back draft
 - Motorized 115v/1ph PO/SC
- Disconnect Switch
- Coatings
 - Epoxy
 - Heresite
 - Coal Tar
- 100va Transformer (110/220/440)
- Diffuser
- Unit Wiring
- Silencer

INDUSTRY APPLICATION

- Steel Plants
- Aluminum Plants
- Glass Plants
- Power Plants
- General Manufacturing
- Chemical Plants
- Mine Processing Plants
- Warehouses
- Pulp and Paper Plants
- Gypsum Wallboard Plants
- Plastics Plants

Construction and Material Specification - Level 1

Fan panel, motor & bearing mounts- All welded G90 galvanized.

Fan blades- Die formed G90 galv., bolted to hub. FRP blades with cast aluminum hub also available.

Hub- Die formed steel, epoxy coated, keyed to shaft.

Bearings- Air handling, self-aligning, cast iron pillow block with grease fittings, L50 = 200,000 hrs. Avg. life.

Shaft- Turned, ground and polished, keyed to propeller hub and sheave.

Drives- Cast iron, 150% S.F., single groove and adjustable thru 3hp, keyed to motor and fan shaft.

Belts- Non-static conducting, oil resistant, single groove thru 3hp.

All specifications are subject to change without notice unless approved in submittal by Moffitt

PF7100-7300 Axial Wall Ventilator

PF7100-7300 Series Wall Box

Wall boxes (housings) are used to mount fans and their accessories in a wall. The box may be positioned inside or outside the building. Typically, the wall box for exhaust applications incorporates a damper on the exterior of the building and a guard on the interior. On supply applications, a rain hood and motorized damper are highly recommended to help prevent moisture from entering into the building. For installation with wall boxes extending outside the building, field caulking and/or flashing of seams and un-used pre-punches mounting holes is required.

Wall Box Flush with Outside Wall

Wall Box in Middle Position

Wall Box Flush With Inside Wall

Notes:

- All Units with motorized damper require the 44" long wall box
- Standard material is G90 galvanized, Aluminum optional
- Dimension "A" includes fastener heads (approx. 5/8" extra)
- Wall box ships assembled with fan unless ordered knocked down for field assembly.
- Angle mounting flanges (optional) ship unattached.
- **CAUTION:** box position when mounted may require additional support (by others)

PF7100-7300 Axial Wall Ventilator

PF7300 Safety Guard

Safety guards are strongly recommended to protect personnel from accidental injury and to prevent objects from entering the fan. OSHA approved guards are required in many installations and when the fans are located within 7 feet of the floor or work/access area.

Level 2 Exhaust Fan Shown - Shown with Removable Wire Guard

Notes:

- Dimension "A" includes fasteners (approx. 5/8")
- Guard is fully assembled and attached to fan unless specified to ship knocked down.
- Sides are G90 galvanized (alum. optional).
- *NOT* compatible with accessory mounting collar or front (propeller) side guard (see wall box/housing). Adequate clearance must be maintained between fan blades and damper or louver.
- Standard wire mesh is 16 ga. galvanized wire welded in 1/2" x 1" mesh mounted in a removable frame.
- Optional aluminum H.D. guard is .051" thick expanded 1/2" x 1/2" mesh mounted in a removable frame. Both choices of wire satisfy OSHA requirements

PF7100-7300 Axial Wall Ventilator

PF7300 Series Wall Collar or Front Guard

The G90 galvanized steel (alum. optional) mounting collar can be used with the flat wire guard or a damper (not both), along with a rain hood for weather protection. This accessory is not compatible with the motor side guard (see also wall box with flat guard). OSHA safety guards are required in many installations and where the fans are within 7 feet of the floor or work/access areas. (Table units in Inches)

PF7100-7300 Axial Wall Ventilator

PF7300 Series Wall Collar or Front Guard cont.

Circulation fan shown suspended from ceiling with front (prop) guard

Exhaust Fan shown in Wall Collar with Motorized Damper

Exhaust (or supply) Fan shown in Wall Collar with Rainproof Louver

Notes:

1. Wall collar and front guard ship fully assembled to fan unless specified knocked down.
2. G90 galvanized construction is standard (aluminum optional).
3. Wall collar length "B" maintains proper clearance for standard motorized shutter.
4. May be used as a front (propeller) side guard when fitted with the flat wire guard, which satisfies OSHA requirements.
5. NOT compatible with accessory- sheet metal and wire motor side guard (see wall box).

PF7100-7300 Axial Wall Ventilator

PF7000-7300 Rain Hood - Supply

Rain hoods are recommended for all supply installations and wherever additional weather protection is desired. Refer to supply style rain hood for supply installations. Rain hoods do not guarantee that water, snow, or other airborne particles will not become entrained in the airstream and enter the building through the fan.

Notes:

- Hoods ship in several pieces for field assembly unless specified factory assembled.
- Sizes 20" to 48" – arrive knocked down in 7 pieces, 54" to 72" arrive knocked down in 13 pieces
- Mounting holes may require field drilling.
- Standard construction is G90 galvanized steel.
- Hoods are sized to fit standard wall boxes/housings.
- Sizes 48" and larger have support angles fastened to front edge.
- Optional bird screen is recommended to prevent critters or debris from entering the fan.
- Rain hoods are recommended for all supply installations and wherever additional weather protection is desired. Refer to supply style rain hood for supply installations.

Lifting lugs

Epoxy Finish (special)

Assembly Instructions for Knocked Down Rain Hoods

1. Align side "A" with top (C)
2. Fasten securely with 1/4" sheet metal screws provided
3. Attach side "B" following the same steps
4. On sizes 48" and larger, attach support angle (D) to front edge as shown with sheet metal screws provided.
5. Attach (optional) wire bird guard (when purchased) to factory flanges/rain channels or to field provided 1 1/2" x 1 1/2" galvanized formed angle (approx. 18ga)
6. Securely fasten to factory wall box flanged (drill as required) and thoroughly flash and caulk wall opening and seams.

Standard Specifications

- Max. Face Velocity: 3000 fpm
- Temp. Limits: -40°F to 200°F (-40°C to 94°C)
- Min. Size: 8 x 8
- Size: Single section: 42 x 64 Max W/H
- Multiple section assembly- Unlimited size
- Frame: 20 gauge galvanized steel Axles; Stainless Steel
- Blades: .025 thick aluminum HD 28 ga. galvanized steel

Notes

- Do not mount fan less than 12 in. from shutter.
- Motors available in 24V, 120V, 240 V & 440V.
- Dampers shipped in individual cartons.
- Motors and mounting hardware ship separately.
- Center-pivoted dampers must be used on reversible fans.
- Multiple section assemblies may require bracing to support the weight of the assembly and to hold against system pressure. (BRACING SUPPLIED BY OTHERS)

PF7100-7300 Axial Wall Ventilator

PF7100-7300 Series Damper Submittal Data - Center Pivot Motorized

Galvanized Steel and Aluminum Dampers

- All dampers can be used for intake or exhaust applications.
- All dampers are factory motorized, 120/240 dual voltage single phase motor, power open-spring close.
- Ample 9/32" x 1/2" slotted mounting holes in 1 1/2" flange.
- Sizes larger than 48" wide are double panel- factory joined.
- Max velocity: 3000 FPM
- Max differential pressure: 2" W.G.
- **NOT SUITABLE FOR USE IN HAZARDOUS OR FLAMMABLE AREAS OR AIRSTREAMS.**

Galvanized Steel Construction - Frame: 14 Gauge

- 16 Gauge galvanized steel center pivoted blades, open to a full 90° to allow full air flow.
- 1/8 inch thick galvanized tie rod w/ attaching blade clip.
- Galvanized dampers have 1/2 inch diameter plated steel pivot shaft with brass grommet bushing.

Aluminum Construction - Frame: 1/8 Inch thick Extruded

- Extruded aluminum blades with nylon bushings are .080 thick center pivoted to allow full 90° opening.
- 1/8" thick aluminum tie rod and attaching blade clip.

PF7100-7300 Axial Wall Ventilator

PF7100-7300 Series Assembly Instructions for Wall Box/Housing

CAUTION: When wall housing extends outside the building, field caulking and/or flashing of seams and unused pre-punched mounting holes is required.

SIZE	MIN. WALL OPENING
24	31 ½
30	37 ½
36	43 ½
48	55 1/2
54	61 ½
60	67 ½
72	81 ½

Instructions

1. Assemble pieces "A", "B" & "C" with flanges on the outside. Use fasteners provided.
2. Install fan in proper exhaust or supply location maintaining the required distance between fan and shutter (if shutter is used).
3. Attach side "D".
4. Install wall box in wall with accessory angles, flat flanges or by other means as needed.
5. *RAINHOODS ARE RECOMMENDED FOR ALL SUPPLY APPLICATIONS AND FOR ADDITIONAL WEATHER PROTECTION FOR EXHAUST APPLICATIONS.*

PF7100-7300 Axial Wall Ventilator

PF7100-7300 Quick Ship Options

The following Quick Ship options are available. Please contact Moffitt Corporation for additional shipping info.

PF 7100-7300 Series – Level 1 Construction

20-48: Single Phase ODP	Next Day
20-42 (1/4 and 1/3 HP only): Single Phase ODP	3-Day
20-48: Single Phase ODP	Next Day
20-48: Fan Body Only*	Next Day
20-48: Wall Pack Assembled**	Next Day
20-48: Gravity Shutter***	Next Day

PF 7100-7300 Series – Level 2 Construction

24-48: Single Phase ODP	10-Day
24-48: Three Phase ODP	10-Day
24-48: Fan Body Only*	10-Day
24-48: Wall Pack Assembled**	10-Day
24-48: Gravity Shutter***	Next Day

Electrical Disconnect Switches, Non fusible Type (Ship loose for field installation) are available for Next Day Shipping:

Open NEMA 1 Enclosure: Single Phase, 115/208-230

Open NEMA 1 Enclosure: Three Phase, 208-230/460

Rain tight NEMA 3 Enclosure: Single Phase, 115/208-230

Rain tight NEMA 3 Enclosure: Three Phase, 208-230/460

Performance ratings do not include the effects of appurtenances (accessories). Power ratings (BHP) do not include transmission losses. Performance certified is for installation type A- free inlet, free outlet. The sound ratings shown are loudness values in fan sones at 5' (1.5m) in a hemispherical free field. Values shown are for installation Type A- free inlet fan sone levels. Due to air stream cooling, the motor leading into the service factor shown does not overheat the motor and is within NEMA recommended limits. BHP at most static pressure points is less than the maximum power shown- in many cases substantially less.

Performance ratings do not include the effects of appurtenances (accessories). Power ratings (BHP) do not include transmission losses. Performance certified is for installation type A- free inlet, free outlet. The sound ratings shown are loudness values in fan sones at 5' (1.5m) in a hemispherical free field. Values shown are for installation Type A- free inlet fan sone levels. Due to air stream cooling, the motor leading into the service factor shown does not overheat the motor and is within NEMA recommended limits. BHP at most static pressure points is less than the maximum power shown- in many cases substantially less.

Performance ratings do not include the effects of appurtenances (accessories). Power ratings (BHP) do not include transmission losses. Performance certified is for installation type A- free inlet, free outlet. The sound ratings shown are loudness values in fan sones at 5' (1.5m) in a hemispherical free field. Values shown are for installation Type A- free inlet fan sone levels. Due to air stream cooling, the motor leading into the service factor shown does not overheat the motor and is within NEMA recommended limits. BHP at most static pressure points is less than the maximum power shown- in many cases substantially less.
